Computers in Industry 20 (1992) 375–377
Elsevier

Contents of Volume 20

Volume 20, Nr. 1, July 1992

State-of-the-Art

1 Object-oriented hybrid intelligent CAD system
W. Zeiler

11 Neural network model for design retrieval in manufacturing systems
V. Venugopal and T.T. Narendran

Applications

25 Truncation of Petri net models for simplifying computation of optimum scheduling problems
L. Shen, Q. Chen and J.Y.S. Luh

45 Translating unrestricted relay ladder logic into Boolean form
J.T. Welch

63 A logic-based framework for address interpretation and rectification
L.G. Occeña and L.-C. Tang

75 High-quality images on a two-piece metal can
Y.-P. Huang

87 Quality and optimum paramater selection in metal cutting
B. White and A. Houshyar

Short Notes

99 Analysis of soil properties and foundation design—Computer applications
E.S. Reddy

103 Statistical model of the strength of some Cameroonian hardwood species in tension
A. Foudjet and J.A. Mukam Fotsing

109 Development of Bézier-based curves
T.V. To and H.N. Phien

News from IFIP TC 5

117 Manufacturing in the Era of Concurrent Engineering—Conference Report

Events

119 Call for Papers

123 Announcements

127 Calendar

Volume 20, Nr. 2, August 1992

State-of-the-Art

133 Solid freeform manufacturing—Possibilities and restrictions
D. Kochan

Knowledge Engineering

141 Evaluation of vibroacoustic diagnostic symptoms by means of the rough sets theory
R. Nowicki, R. Słowiński and J. Stefanowski

153 Default logic: A practical approach to expert systems
M.T. Tabucanon, V. Wuwongse and N. Juneja

Applications

163 Scheduling manufacturing systems
W. He and A. Kusiak

177 Hierarchical structure of a computer-integrated quality management system in a CIM environment
G. Wu, F. Shao and B. Hu

187 Definition of a control service in the application layer of the ISO/OSI reference model for control stations
E. Chacón and O. Llanes

193 NC parts programs generation from CAD exchange files
C. Cogun

203 Modular CNC system for multi-axes motion devices
F. Fadul and L. Arnold

209 Qualitative partial differential equations and their realistic applications
M. Dohnal

219 Development of a CAD/CAM robotic translator for programming the IBM 7535 SCARA robot off-line
K.V. Kamisetty and K.J. McDermott

Short Note

229 Computer simulation and its management applications
T.C.E. Cheng

News from IFIP TC 5

239 Minutes of the 7th Working Group and Task Force Chairpersons' Meeting

Events

243 Call for Papers

249 Calendar

Volume 20, Nr. 3, October 1992

State-of-the-Art

255 Information technology and structural change in the paper and pulp industry—Some technological, organizational and managerial implications
J. Ranta, M. Ollus and A. Leppänen

Knowledge Engineering

271 Application of an expert knowledge-based system to the semiconductor thin film device coating process
K. Rajendran

Applications

275 A computer-aided prototype system for NC rough milling of free-form shaped mechanical part-pieces
G. Catania

295 Points of correspondence in stereo images with no specific geometrical constraints using mathematical morphology
M.T. Boraie and M.A. Sid-Ahmed

311 An on-line light bulb inspection system using afterglow decay measurements
A. Haq Qureshi, S.G. Belovich and M. Ahmad

321 Microcomputer-based welder training simulator
C. Wu

327 Control software prototyping
A.E.K. Sahraoui and N. Ould-Kaddour

Short Notes
335 A two-phase procedure for the study of computer network reliability in automated manufacturing systems
T. Gupta and E. Abuelyaman
345 A tandem queue with a general bulk service and servers' "vacation"
G.V. Krishna Reddy, R. Nadarajan and P.R. Kandasamy
